

Founded in 2002, LIFE & BRAIN GmbH serves as commercial hub of the University of Bonn Medical Center. Under one roof scientist from academia and LIFE & BRAIN work together to develop innovative products and services for disease-related research and therapy development.

The platform LIFE & BRAIN CELLOMICS specializes in the development of induced pluripotent stem cell-based products and services for CNS disease modeling and drug discovery. For our expanding activities we are looking for a

Research Scientist

Cell Manufacturing and Assay Development

Would you like to work in a small, highly motivated team of young translational scientists to develop new stem cell-based products and services in the middle of a vibrant academic campus?

Key responsibilities

- Cell reprogramming, genetic modification and neural differentiation of pluripotent stem cells
- Implementation of large-scale cell manufacturing protocols and appropriate quality controls
- Assay adaptation & development
- Generation of reports for customers and funding agencies

Your Qualifications and Skills

- Postdoctoral or Master degree in biology, biotechnology or related research areas.
- A minimum of one year experience in mammalian cell culture; experience with human pluripotent stem cell culture and differentiation would be desirable.
- Expertise in basic biochemical, cell biological and molecular biological techniques (e.g. qPCR, fluorescence microscopy, pharmacological assays, immunoassays).
- Sound knowledge in cell biology and neurobiology.
- Experience in stem cell-based disease modeling and industrial R&D would be desirable.
- Excellent organization, reporting and communication skills, team-oriented working attitude.
- Good written and spoken English knowledge

Our offer

- Work in a team of highly motivated young translational scientists at the interface of academic excellence and commercialization.
- Company pension scheme (VBLU)
- Subsidized use of public transport (job ticket)
- An initial fixed term of 2 years according to TzBfG
- Remuneration according to TV-L

LIFE & BRAIN is an equal opportunity employer. Applications will be treated in accordance with the Landesgleichstellungsgesetz (LGG). The application of suitable people with proven severe disabilities and those of equal status is particularly welcome.

By submitting your application, you agree that your data will be collected digitally and used solely for the purposes of the selection process. After completion of the selection process, the documents will be destroyed in compliance with data protection regulations.

Please send your application quoting the reference number LB02_2019 along with a short letter of motivation and the names of 3 references until March 15, 2019 to:
